

## Specification Sheet Detectable ID Tags

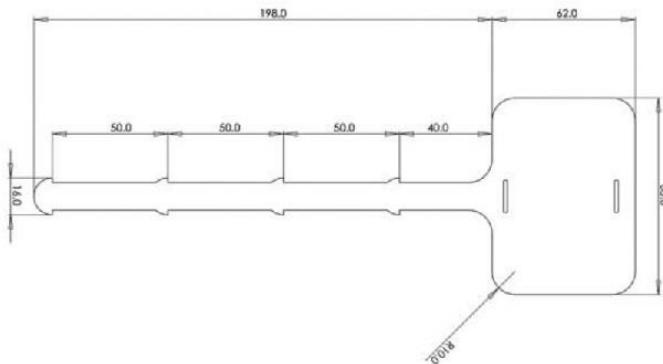

Our metal detectable ID tags can be used for the identification of all kinds of industrial equipment, machinery and other assets. Not only are they metal detectable and x-ray visible, but they are also shatter resistant, making them less likely to cause any contamination.

The ID Tags can be marked with permanent markers multiple times, for repeat identification use in your factory setting. They are available in 6 colours to be used as part of a factory colour code system, and can assist with your HACCP and BRC compliance.

### **Product Advantages**

- Detectable by conventional metal detectable systems
- Can be used as part of HACCP procedures
- Snap-resistant
- 6 bright colours for easy visual identification
- X-ray Visible
- EU 10/2011 Compliant
- Adjustable Strap
- High Strength

### **Applications**

Range of industrial tagging applications for factories, bakeries, food packaging plants etc

### **Material**

Metal Detectable material, approved for food contact under appropriate EU and US food contact compliance regulations.

### **Dimensions**

Overall Length: 260mm  
Paddle Size: 85x62mm  
Face Thickness: 1.5mm

### **Colour Options**

Blue, Green, Red, Black, Yellow and Orange.
