

Specification Sheet Gate Valve Lockouts

Our Gate Valve Lockout devices have a clamshell design, completely encompassing a gate valve. Once locked, using a padlock, hasp or security seal, the clamshell rotates freely around the hand wheel, preventing it from being turned. Available in 6 sizes to fit standard gate valves.

Material

Durable Polypropylene

Applications

For the effective lockout of all sizes of standard gate valve. Resistant to cracking and abrasion & extreme weather and temperature conditions.

Sizing

Part No.	Sizing guide, to fit following valve handle diameters
SGVL01	2.5cm - 6.25cm
SGVL02	6.25cm - 12.5cm
SGVL03	12.5cm - 16.5cm
SGVL04	16.5cm - 25cm
SGVL05	25cm - 33cm
SGVL06	33cm - 45.75cm

Customisation Options

Available in 6 sizes – we are also able to supply oversized valve locks (upto a max valve handle of 18”).

Available Colours

Red as standard – other colours available upon request

Packaging

Size dependent. Weight and dimensions upon request
